Transfer Pricing Study (TPS)

In the light of the Organisation for Economic Co-operation and Development's (OECD) Base Erosion and Profit Shifting (BEPS) initiative, transactions between related parties are expected to be undertaken at arm's length. Multinational groups must ensure that intragroup transactions satisfy the arm's length criterion by carrying out a TPS. Our team of experienced transfer pricing experts in association with TPAC are ready to support you in this highly technical area with the use of one of the most advanced software.
